

FLEX-MAT®

HIGH VIBRATION WIRE SCREEN

APPLICATION CASE STUDY

IODINE > Chile

SITUATION:

The mine had been using polyurethane 1x1 panels in its processing plant, but was experiencing problems with blinding and pegging.

PROBLEM:

- Inefficient screening due to blinding and pegging.
- The screen media created build up and resulted in expensive cleaning.

SOLUTION:

Switched to **FLEX-MAT Type D** stainless steel modular panels.

- Blinding and pegging eliminated.
- Eliminated extra labor for cleaning.

BENEFITS:

- > Higher capacity.
- > Drastically reduced downtime.

**FLEX-MAT TYPE D ELIMINATED
ALL LABOR AND DOWNTIME
ASSOCIATED WITH CLEANING.**
